CONTRIBUTIONS

- fastify-lm
- mcp-vs-fnc
- Axioma

SKILLS

- AI-Powered Solutions
- Engineering Leadership
- Process Optimization
- Software Architecture
- Stakeholder Management
- Agile Delivery

TECH STACK

- **AI & Logic:** Axioma Framework, MCP, LLM Orchestration, System Prompts.
- **Backend:** Node.js, Fastify, RabbitMQ, CloudEvents.
- **Frontend:** React, Next.js, TanStack Query, WebSockets.
- **Infra:** AWS, Docker, GitHub Actions (CI/CD).

CERTIFICATES

- Leadership: Engineering Management (03/2022)

SUMMARY (PROFILE)

Software Engineer with over 20 years of technical expertise, specializing in transforming the Software Development Lifecycle (SDLC) through innovative architectures and large-scale AI adoption. Creator of **Axioma**, a clean-architecture framework designed to lead the next decade of AI-assisted development by decoupling business logic for seamless agentic orchestration. Currently focused on industrializing engineering processes and designing "Agent-First" workflows for high-scale organizations.

STRATEGIC FLAGSHIP: AXIOMA

An infrastructure-agnostic framework designed for the AI era. It eliminates friction between LLMs and complex systems via a contract-based structure, allowing AI agents to understand and execute business logic autonomously. Currently serving as the architectural engine for Cencosud's SDLC transformation, enabling contract-based AI orchestration.

PROFESSIONAL EXPERIENCE

- **Cencosud S.A. — Software Engineer (Dec 2025 – Present):** Leading a radical shift in the software construction model for +800 developers and 120,000 employees, redefining the technology strategy through AI.
  - **SDLC Re-engineering (Global Strategy):** Original Agent-First workflow, **selected over alternatives from Google, AWS, and Microsoft** due to its end-to-end SDLC coverage (User Story → PR); projected **2x–3x faster TTM** and reduced ambiguity.
  - **Agent Infrastructure (MCP):** Standardized agent access to tools/data using MCP for coherent, scalable automation.
  - **Release Operational Efficiency:** Rebuilt Android/iOS release flow with orchestrated bash scripts; cut manual work from **50** minutes to **5** automated, eliminating human error.
  - **Quality Engineering & Data Insights:** Living documentation auto-maintained; real-time progress for executive decision-making.
- **Rooftop — Senior Technical Interviewer / Staff Consultant (Jul 2025 – Dec 2025):** Specialized technical validation and talent calibration for global partners.
  - **Senior Talent Assessment:** Executed 50+ deep-dive technical assessments for Senior Node.js, React, and AI roles, ensuring elite-level talent acquisition for global partners.
  - **Technical Benchmarking:** Standardized evaluation metrics for system architecture and problem-solving, directly impacting the quality of high-performance engineering squads.
  - **Staffing Consultancy:** Advised on aligning technical profiles with business needs to support modern, scalable architectures.

- React.Js (05/2021)
- Python (08/2020)
- Technical Bachelor's in Electronics (12/1997)

PROFESSIONAL EXPERIENCE (CONTINUED)

- **Egg Live — Engineering Manager / Software Engineer (Jun 2021 – Present):** Evolved from frontend architecture definition to technical leadership; scaled platform to 50x concurrent users.
  - **B2B Ecosystem Integration:** Event-driven architecture (CloudEvents + RabbitMQ) to connect LMS clients (Mercado Libre, Telefónica, Globant).
  - **AI Agent Orchestration:** General-purpose API on **fastify-lm** for rapid agent creation (LLM selection, prompts, tools).
  - **Culture & Talent Management:** P&CR program; mentored 30+ developers during hypergrowth.
  - **Frontend Architecture:** Core redesign (TanStack Query + WebSockets): 10x fewer API calls, real-time state for 5k+ concurrent users.
- **Gadget — Software Engineer (Apr 2010 – Jun 2021):** Led modernization from legacy to scalable SaaS.
  - **Architectural Modernization:** Built core architectures with React, Node.js, AWS; migrated legacy workflows to cloud/CDN stacks.
  - **Industry Transformation:** Delivered interactive digital galleries, replacing physical media.
  - **Scalability:** Maintained 98.7% uptime; optimized performance for niche, high-value platforms.
- **LBC Tech (ex Luis Brunelli y Cía) — Founding Lead & Business Strategist (Jan 2004 – Mar 2010):** Built the technology division from zero and drove national expansion.
  - **IT Department Foundation:** Strategy, staffing, and operations; built a 13-person team.
  - **Expansion & Supply Chain:** US provider network and national logistics; presence across the country.
  - **Transformation Vision:** Converted diversification into a large tech/hardware operation with new revenue streams.

OPEN SOURCE & ECOSYSTEM IMPACT

- **fastify-lm:** Standardizing LLM integration for the Fastify ecosystem.
- **mcp-vs-fnc:** Comparative research on AI communication protocols to guide agent interoperability.
- **development-guide:** Engineering culture and standards for high-performance teams.
- **@interpolator/xlsx:** Dynamic document automation engine for business processes.
- **@galiprandi/array-tools:** High-performance JavaScript utilities for SQL-like operations on arrays.
- **@galiprandi/react-tools:** Lightweight React utilities and components for UI productivity.
- **zero-ui:** Concept exploration of invisible interfaces.
